P – Preliminary, Q – Quarter, F – Final

In his testimony to the Senate Banking Committee, Fed Chair Powell retained an optimistic tone on the outlook for the US economy and said “for now, the best way forward is to keep gradually raising the federal funds rate.”

China’s Q2 real GDP growth was as expected; but activity data was weaker than expected in June

In the **US, Federal Reserve (Fed) Chair Jerome Powell** reaffirmed a gradual approach to monetary policy tightening in his semi-annual testimony to the Senate Banking Committee. There was little new information in his testimony relative to recent Federal Open Market Committee (FOMC) communication during and after the June FOMC meeting. However, Powell retained an optimistic tone on the outlook for the US economy and said that the “best way forward” for now was to “keep gradually raising the federal funds rate.” The Fed sees current unemployment as low, and likely to fall further, and expects inflation to be near the symmetrical 2.0% target over the next several years.

In terms of **US** data releases last week, **retail sales** rose 0.5% mom in June, as expected. This followed a solid release in May, which was revised up 0.5 percentage points to 1.3% mom. Meanwhile, the core retail sales (control group) remained broadly unchanged after the prior release was upwardly revised to 0.8% mom (previously +0.5% mom). The **NAHB/Wells Fargo Housing Market Index** held steady at 68 in July, in line with expectations. The details showed that the measure of prospective buyer traffic rose two points to 52, suggesting that buyer demand remains firm despite higher mortgage costs. However, **housing starts** tumbled 12.3% mom in June to 1,173,000 annualised, more than the expected decline of 2.2% mom. Data for April and May were also revised lower, by a cumulative 23,000. Both single and multi-home new construction declined in June, with all four regions contributing to the fall. **Building permit** applications also fell by 2.2% mom, missing an anticipated 2.2% rise. Nonetheless, despite a disappointing housing starts release, other recent housing data releases suggests demand remains high, with the average days on market for existing homes trending at recent lows and a recent homebuilder survey report showing relatively healthy traffic levels.

In Europe, **UK CPI inflation** held at 2.4% yoy in June, defying expectations of an increase to 2.6%. Although energy price inflation rose as anticipated, this was offset by weaker core inflation (unexpectedly declining to +1.9% yoy from +2.1%) amid weakness in the volatile clothing/footwear and recreation/culture categories.

In Asia, **China’s GDP** grew 6.7% yoy in Q2, in line with expectations and slightly slowing from 6.8% in Q1. However, economic momentum seemed to gather pace, as quarterly growth accelerated to 1.8% qoq, the highest in three quarters. Robust personal consumption continued to support the economy, while investment slowed further as Chinese authorities continued to reduce corporate leverage. **Retail sales** accelerated from 8.5% yoy in May to 9.0% yoy in June, beating expectations (+8.8%). **Fixed asset investment** (YTD cumulative) edged down slightly, from 6.1% yoy to 6.0%, but still remained more muted than the 7.5% seen on average in Q1. Slowing investment and concerns about the US-China trade war helped explain a significant deceleration in June **industrial production**, from 6.8% yoy in May to 6.0%.

# The week ahead

## Macro data and key events

Date	Country	Indicator	Data as of	Survey	Prior
Monday 23 July	US	Existing Home Sales (mom)	Jun	0.9%	-0.4%
Tuesday 24 July	Eurozone	Markit Composite PMI	Jul P	54.7	54.9
Wednesday 25 July	Germany	Ifo Business Climate Index	Jul	101.5	101.8
	US	New Home Sales (mom)	Jun	-2.8%	6.7%
Thursday 26 July	Eurozone	ECB Interest Rate Decision	Jul	-0.4%	-0.4%

	US	University of Michigan Index of Consumer Sentiment	Jul F	97.2	97.1 P

P – Preliminary, Q – Quarter, F – Final

In the coming week, the first estimate of US Q2 GDP and durable goods orders will be in focus...

...as well as the European Central Bank monetary policy decision

## US

The **first estimate of Q2 GDP** is expected to show the economy grew at a solid pace of 4.1% qoq annualised in Q2, after a lacklustre start to the year. A rebound in consumer spending and a surprise narrowing of the trade balance are likely to be key drivers of this pickup. Alongside this release, the U.S. Bureau of Economic Analysis will also publish a comprehensive update to the national income and product accounts (last conducted in 2013), which will incorporate methodological improvements, definitional changes and updated source data.

**New home sales** are expected to decline 2.8% mom in June, from 6.7% mom in May. While consumer demand has remained steady, supply-related factors may have continued to weigh on sales. In particular, much of the newly built housing stock has been concentrated on more expensive units, exacerbating the supply shortage in the lower-end segment of the market.

**Durable goods orders** are expected to rebound in June, rising 2.8% mom from a decline of 0.4% in May. The ISM new orders index edged down slightly but remained high at 63.5 in June. The industrial production report for June indicated healthy growth in ex-transportation durable goods output. Overall, these data releases appear consistent with the solid momentum in the industrial sector and a pickup in business equipment investment in Q2.

## Europe

The preliminary estimate of the **eurozone Markit Composite PMI** for July is expected to edge 0.2 points lower to 54.7. This would still be above the recent low reached in May (54.1). Despite the decline in the region's PMI prints since the beginning of the year, they remain consistent with above-trend growth, and the employment component of the services index is hovering at levels last seen in 2007.

Following large declines in early 2018, **Germany's Ifo Business Climate Index** has more recently stabilised at around 102, which remains a historically elevated level. There could be a slight deterioration in July's print amid continuing concerns over global trade protectionism.

At its last policy meeting in June, the **European Central Bank** announced its intention to stop its net bond-buying programme by the end of this year, and to keep interest rates unchanged at least through the summer of 2019 or "for as long as necessary" to allow inflation to return to target on a sustained basis. Recent data releases have shown a stabilisation in eurozone activity, and underlying inflation remains subdued, making it unlikely the bank will announce any change to its policy at the July meeting.

# Market moves

---

## Equities

Global equities were pressured by mixed corporate earnings results and renewed global trade concerns

## Bonds

US Treasuries closed lower following Powell testimony; UK gilts outperformed as disappointing data weighed on rate hike expectations

## Commodities

Oil prices fell on concerns over China's economy and Saudi supply

## Equities

**US equities** were little changed last week, with early-week gains on the back of some upbeat earnings reports and Fed Chair Jerome Powell's upbeat assessment of the US economy pared back later in the week by some softer results and fresh concerns about global trade tensions. On Thursday, US President Donald Trump announced he is "ready" to impose tariffs on all Chinese goods imported by the US (a total of USD505 billion in 2017). Overall, the S&P 500 Index finished flat.

**European equities** also ended the week little changed, pressured by mixed economic data from China, lower commodity prices, global trade concerns and mixed corporate earnings results. Overall, the EURO STOXX 50 Index was 0.2%, with energy stocks underperforming amid lower oil prices. France's CAC 40 underperformed (-0.6%).

In **Asia, stock markets** were mixed as tensions between the US and China on import tariffs continued while most Chinese economic indicators came in weaker than expected as the country continued to rein in corporate leverage. Meanwhile, market sentiment was supported by an upbeat start to the corporate earnings season. Hong Kong shares retreated the most (the Hong Kong Hang Seng Index was down -1.1%) followed by Korea's KOSPI (-0.9%). Other markets gained over the week. In Japan, the Nikkei 225 Index closed up modestly (+0.4%) and the Singapore Straits Times Index advanced 1.1%. China's Shanghai Stock Exchange Composite Index and India's SENSEX 30 Index were little changed.

## Bonds

**US Treasuries** sold off slightly over the week following Fed Chair Jerome Powell's congressional testimony, which kept the Fed on track to deliver its gradual policy rate hiking path for this year. Dampened demand for fixed income assets also came amid upbeat economic data, including upward revisions to US retail sales and a fall in initial jobless claims to their lowest levels since December 1969. However, there was some paring of these losses as risk appetite was hit by concerns over renminbi weakness and additional Chinese easing measures to support a slowing economy. Overall, 10-year Treasury yields closed up 7 bps to 2.89% and policy-sensitive two-year yields rose 2 bps to 2.59%.

**European government bonds** traded mixed over the week with benchmark German 10-year bund yields ending little changed at 0.37% and their UK equivalents outperforming (yields fell 4 bps to +1.23%) as weak inflation and retail sales data weighed on expectations of a Bank of England rate hike in August. In the periphery, Italian 10-year bond yields erased earlier week gains to close at 2.59% following a sell-off on Friday amid political concerns on reports that the country's finance minister Giovanni Tria, whose appointment brought a relative calm to the nation's markets, may be forced to step down.

## Commodities

**Crude oil prices** fell again last week, with the bulk of the decline occurring on Monday amid concerns over mounting supply from Saudi Arabia, as well as an economic slowdown in China. Some losses were pared back later in the week as the U.S. Energy Information Administration weekly report showed that US gasoline stockpiles fell and fuel demand increased last week. Overall, Brent crude fell 3.1% to close at USD73 a barrel.

**Gold prices** also fell last week (-0.8% to USD1,232 per troy ounce), with most losses occurring on Tuesday as Fed Chair Jerome Powell said the central bank will continue to gradually raise interest rates.

**Disclaimer:**

This document has been issued by The Hongkong and Shanghai Banking Corporation Limited, India (HSBC India/the 'Bank') in the conduct of its regulated business in India and may be distributed in other jurisdictions where its distribution is lawful. The source of this document is HSBC Global Asset Management. This document is for resident Indian customers of HSBC India. This document must not be distributed to any other persons and in particular should not be distributed to the residents of United States of America, Canada, Australia or New Zealand or any other jurisdiction where its distribution is unlawful or where such distribution, publication, reproduction, availability or use would be contrary to law or regulation. It is not intended for anyone other than the recipient. The contents of this document may not be reproduced or further distributed to any person or entity, whether in whole or in part, for any purpose. It may also be legally privileged. If you have received this email in error please notify the sender immediately by return e-mail and delete the same from your system. If you are not the named addressee, you should not disseminate, distribute or copy this e-mail. If you are not the intended recipient you are notified that disclosing, copying, distributing or taking any action in reliance on the contents of this information is strictly prohibited. All non-authorised reproduction or use of this document will be the responsibility of the user and may lead to legal proceedings. This document has no contractual value and is not and should not be construed as investment advice or as an offer or the solicitation of an offer or a recommendation for the purchase or sale of any investment in any jurisdiction in which such an offer is not lawful. The Bank accepts no responsibility for the accuracy and/or completeness of any third party information obtained from sources it believes to be reliable but which it has not independently verified. The Bank makes no guarantee, representation or warranty and accepts no responsibility or liability for the accuracy or completeness of the information and/or opinions contained in this document, including any third party information obtained from sources it believes to be reliable but which has not been independently verified. In no event will the Bank or HSBC Group be liable for any damages, losses or liabilities including without limitation, direct or indirect, special, incidental, consequential damages, losses or liabilities, in connection with your use of this document or your reliance on or use or inability to use the information contained in this document, even if you advise us of the possibility of such damages, losses or expenses. The Bank does not undertake any obligation to issue any further publications or update the contents of this document. The information stated and/or opinion(s) expressed herein constitute best judgement of the Bank at the time of publication and are subject to change without notice and are expressed solely as general market commentary for general information purposes only and do not constitute investment advice or recommendation to buy or sell investments or guarantee of returns. The Bank has not been involved in the preparation of such information and opinion. It does not have regard to specific investment objectives, financial situation and the particular needs of any specific person who may receive this document. The information contained within this document has not been reviewed in the light of your personal circumstances. Please note that this information is neither intended to aid in decision making for legal, financial or other consulting questions, nor should it be the basis of any investment or other decisions. You should carefully consider whether any investment views and investment products are appropriate in view of your investment experience, objectives, financial resources and relevant circumstances. The investment decision is yours but you should not invest in any product unless the intermediary who sells it to you has explained to you that the product is suitable for you having regard to your financial situation, investment experience and investment objectives. The relevant product offering documents should be read for further details. This document is for circulation in India only. HSBC India makes no representations that the products or services mentioned in this document are available to persons of any other country or are necessarily suitable for any particular person or appropriate in accordance with their local law. Among other things, this means that the disclosures set forth in this document may not conform to rules of the regulatory bodies of any other country and investment in the products discussed will not afford the protection offered by the local regulatory regime in any other country. Products related to some of the asset classes may not be available for sale by HSBC India. HSBC India or its affiliates or their officers, directors and employees may have investments in any of the products mentioned in this publication (or in any related products) and may from time to time, add to or dispose of any such investment. Value of investment may increase or decrease, and may become valueless. Certain investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. Value and income from investments may be adversely affected by exchange rates, interest rates, or other factors. Investment involves risk. It is important to note that the capital value of investments and the income from them may go down as well as up and may become valueless and investors may not get back the amount originally invested. Past performance contained in this document is not a reliable indicator of future performance whilst any forecasts, projections and simulations contained herein should not be relied upon as an indication of future results. The historical performance presented in this document is not indicative of and should not be construed as being indicative of or otherwise used as a proxy for future or specific investments. The relevant product offering documents should be read for further details. Investment in any market may be extremely volatile and subject to sudden fluctuations of varying magnitude due to a wide range of direct and indirect influences. Such characteristics can lead to considerable losses being incurred by those exposed to such markets. If an investment is withdrawn or terminated early, it may not return the full amount invested. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavourable fluctuations in currency values, from differences in generally accepted accounting principles or from economic or political instability in certain jurisdictions. Narrowly focused investments and smaller companies typically exhibit higher volatility. There is no guarantee of positive trading performance. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. Economies in emerging markets generally are heavily dependent upon international trade and, accordingly, have been and may continue to be affected adversely by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be affected adversely by economic conditions in the countries in which they trade. Mutual fund investments are subject to market risks. You should read all scheme related documents carefully. In case you have individual portfolios managed by HSBC Global Asset Management Limited, the views expressed in this document may not necessarily indicate current portfolios' composition. Individual portfolios managed by HSBC Global Asset Management Limited primarily reflect individual clients' objectives, risk preferences, time horizon, and market liquidity. Some of the statements contained in this document may be considered forward-looking statements which provide current expectations or forecasts of future events. Such forward-looking statements are not guarantees of future performance or events and involve risks and uncertainties. Such statements do not represent any one investment and are used for illustration purpose only. Customers are reminded that there can be no assurance that economic conditions described herein will remain in the future. Actual results may differ materially from those described in such forward-looking statements as a result of various factors. We can give no assurance that those expectations reflected in those forward-looking statements will prove to have been correct or come to fruition, and you are cautioned not to place undue reliance on such statements. We do not undertake any obligation to update the forward-looking statements contained herein, whether as a result of new information, future events or otherwise, or to update the reasons why actual results could differ from those projected in the forward-looking statements. We do not undertake any obligation to issue any further publications to you or update the contents of this document and such contents are subject to changes at any time.
